REGULUS | by Axion Consultancy Services

EXECUTIVE OVERVIEW · ENTERPRISE COMPLIANCE INTELLIGENCE

Turn regulations into consistent, explainable compliance decisions.

Axion Regulus is an AI-powered compliance intelligence platform. It reads your regulatory documents and policies, converts them into structured rules, and checks business content against them, with findings, evidence and recommended actions your reviewers can act on.

AI assists. Humans decide.

Every finding is reviewed by an authorized person before action.

HOW IT WORKS

01 Ingest
Upload regulations, policies and guidelines.

02 Understand
AI analyzes and structures the regulatory text.

03 Generate rules
Requirements become configurable rules.

04 Validate
Content is checked against the applicable rules.

05 Detect risk
Potential violations are scored and flagged.

06 Act
Reviewers get evidence and next steps.

KEY OUTCOMES

Faster review turnaround
First-level checks are automated, so reviewers start from a structured result, not a 90-page circular.

Consistent risk scoring
Every submission is scored against the same rules (high / medium / low risk), whoever is on shift.

Risks caught before publishing
Potential issues surface before content reaches customers or regulators.

An audit-ready evidence trail
Each finding links to the rule that triggered it, the supporting evidence and the reviewer's decision.

ONE CLAIM, START TO FINISH

MARKETING CONTENT — ILLUSTRATIVE EXAMPLE

SUBMITTED CLAIM

"Our new formula boosts immunity and prevents illness."

● RISK: HIGH

Rule triggered: RULE-041 · Marketing claims must be substantiated and must not imply a medical or therapeutic effect.

Why: The statement implies a health benefit not supported by evidence on file.

Recommendation: Revise or substantiate the claim against the applicable requirement.

Decision: Approve | Modify | Reject | Escalate

BUILT FOR REGULATED INDUSTRIES

Healthcare & Pharmaceutical
Product information, promotional material and healthcare communications.

Food & Nutraceutical
Health and nutrition claims, labels and product descriptions.

Financial Services
Financial communications, policies, AML-related workflows and governance.

Marketing & Advertising
Ads, social posts, campaigns and website content, before they go live.

Cosmetics
Product claims and marketing content against labelling and advertising rules.

Corporate Governance & Risk
Policies, procedures and internal documents across business units.

DEPLOYMENT OPTIONS

- **Dedicated enterprise workspace**, separated at workspace level from other organizations' content.
- **Configured to your frameworks**: bring your own regulations, internal policies and jurisdictions.
- **Delivered by Axion directly or through implementation partners**, sized to your organization.
- **Hosting, integration and pricing** are scoped with your compliance, IT and security teams during evaluation.

SECURITY & GOVERNANCE

- **Role-based access** for admins, compliance, reviewers and business users.
- **Authentication required** for every workspace.
- **Configurable workflows**, permissions and data-governance controls.
- **Human review** at every stage before a decision is finalized.

See it on your own regulations.

Bring a regulatory document, a policy or a piece of content. In a live demo we'll turn it into structured checks and show what Regulus flags and why.
